WORK EXPERIENCE

- Extentia Information Technology / Mid 2015 - Current**
Have been working as a Web developer dealing with both front end and back end.
 - MV* framework & libraries [JQuery, Backbonejs, RequireJS, Angular 1 & 2, D3.js, Underscore.js]
 - Work alongside UI frameworks like [Bootstrap, JQuery UI, and Ionic]
 - Dev Ops platforms [AWS, Heroku and am comfortable working and setting up environments on the Linux Terminal]
 - Backed and supporting technologies [Nodejs(express.js, hapi), Bower, npm, MySQL, MongoDB, Basic PHP]
 - Tools Used : Putty / ZoC, RoboMongo, Gulp, Brackets, VS Code / Sublime text, Dreamweaver , JetBrains WebStorm , Cmder , Git / SVN, Photoshop, Premier Pro, Axure

Lastly, technically led an initiative for upcoming technology called "TechQuarium". This was often client facing where we developed applications and Proof of concepts on untested and innovative technologies.

These included but were not limited to Amazon Alexa, Google Home, Electric Imp IoT, Intel Edison, Neurosky Mindwave, etc.
The role played was to suggest relevant use cases to the client specific problems and then build solutions to show case how we could solve them.
